The Syrians bave shown they are villing to use force as a means of pressure on the king. In September 1970, the Syrians invaded Jordan during the fighting between the Jordanian Army and Palestinian guerrillas. They threatened to do so again in December 1980 to disrupt an Arab summit being beld in Am-

The repercussions of the U.S. withdrawal here, as symbolized by the Marines' departure, are likely to go far beyond Jordan. President Hosni Mubarak of

Egypt already has put the Reagan ministration on notice of the vast political effect on all the United States's allies in the Middle East, In an interview with The Washington Post about two weeks ago, he described the Marines' departure as "a disaster" and said, "You're going to lose the confidence of all your friends in the area."

President. Reagan seemed well aware of this implication of his decision to redeploy the Marines. He said in a newspaper interview this month that "if we get out, it also means the end of any ability on our part to bring about an over-all peace in the Middle East and 1 would have to say it means a pretty disastrous result for us worldwide. Egypt, under Mr. Mubarak, has

already begun showing signs of embarrassment about its close cooperation, both political and military, with the United States. The debacle of U.S. policy in Lebanon can only encourage a reassessment of this policy and strengthen opposition voices demanding that Egypt take a more neutral stand. One possible outcome of such a

reassessment could be the restorawith the Soviet Union, whose ambassador was expelled from Cairo in September 1981 at the same time Egypt withdrew its envoy from Another is likely to be increased

# Iraq Says Its Jets **Struck Tankers** At Kharg Island

BAGHDAD - Jet fighters of lrag's air force on Monday attacked an undisclosed number of nil tankers anchored at Kharg Island, Iran's strategic Gulf oil terminal, an official Iraqi announcement

The air raid "signals the begin-ning of the blockade which we have decided to impose on this area," a military spokesman said in a communique read on the state television. "We warn once again all oil tankers and ships not to approach Kharg Island and other franian

There was no immediate word of damage or injuries in the raid, al-though the spokesman referred to 'destructive strikes."

Iran has frequently threatened to close the Strait of Hormuz at the southern end of the Gulf, through which about one-sixth of the noncommunist world's supply of crude oil flows, if its shipping through the strait was disrupted. Western experts have expressed fear that such an action could bring about superpower intervention in the Gulf region. Iran did not immediately re-

spond to the Iraqi claim of a block-

In Washington, a State Department spokeswoman said of the Iraqi report, "We don't have any reason to doubt that the reports of attacks on Iranian tankers are true," although she said the attacks had not been officially confirmed.

About 90 percent of Iran's oil exports, which total about 1.7 mil-

main source of funds for Iran's war effort against Iraq, are shipped from the Kharg Island terminal. The Iraqi spokesman, reading the communique, said the raid was in "fulfillment of a threat made by Iraq earlier this month and to punish the Iranian regime for attacking

lion barrels per day and are the

our people and our territories." The spokesman vowed that "we will continue our attacks until the enemy halts its aggression and Council resolutions" calling for an end to the war, which started in September 1980.

The spokesman said, "We warn that we will strike at the appropri-ate time all Iranian targets on land and water as a punishment for the regime which insists on its aggression against our country.

Iraqi forces in past months have artacked a number of vessels en route to Iranian ports at the northern end of the Gulf. President Rnnald Reagan

varned last week that he would use U.S. warships stationed in the Arabian Sea to prevent Iran from closing the strait. Britain has indicated it might join the United States in such a blockade. The speaker of Iran's parlia-

# Blacklist Data

### The Action Followed Queries by Reporter

By Howard Kurtz Washington Post Service

WASHINGTON — A senior U.S. Information Agency official ordered the disposal of internal documents relating to a "blacklist" of outside speakers days after a reporter first inquired about the list laie last month.

The USIA general counsel. Thomas Harvey, said Sunday that be had directed subordinates to throw out all surviving copies of 135 weekly lists of proposed agency speakers that included written comments on the proposed speak-

ers by top USIA officials.

Mr. Harvey said that he had not reviewed the documents before issuing his instructions, was not aware that they contained com-ments by officials and believed in retrospect that the papers should have been retained.

The destruction of the internal papers is the first indication that some agency officials may have tried to cover up details of the blacklist episode to minimize its political fallout.

Mr. Harvey said he had asked that the weekly reports be thrown out because "we shouldn't be trying to look for scapegoats."

"You ought to correct a management deficiency and move on." he said. "We're not talking about the commission of a crime. We're talk-

ing about bad management." Mr. Harvey said that the lists would be subject to U.S. naval gun-were duplicative and most were fire or strikes by planes from airnever returned by agency officials, who preferred to block certain speakers through private conversa-

tion rather than written comment. Senate investigators learned of the destruction when they requested the weekly lists as part of an inquiry into USIA's reputed practice of blocking persons considered too liberal to speak abroad for the agency, officials of the agency said.

Act. e Senate bill to be tested this

Heinz 3d, Republican of Pennsyl-

The Senate is expected to pass some version of the Garn-Heinz Heinz bill gives the Pentagon a virbill on Wednesday, but its final

The Reagan administration has taken a hands-off position because of heated conflicts between administration officials, but it will probatee meets to settle on a single bill for the president's signature.

The House passed its version of the legislation last October. The chief sponsor was Representative Washington. Even if the Senate ir tougher rules, chiefly to keep acts by Wednesday, it is unlikely that the two chambers will be able ie Soviet Union, and those who to settle differences before the bill expires. So the expectation is that the existing law will be extended 15 or 30 days.

Here are some of the main provi-sions of the Garn-Heinz bill and the House version: · Contract sanctity - The Sen-

ate bill authorizes the president to order the breaking of contracts with an offending country only in the extreme case of war or a nationrepresents a compromise be- al emergency. This provision is bard-liners led by Senator strongly backed by business lobby-) E. Garn, the Utah Republi- ists. But Senator William L. Armwho is chairman of the Senate strong, Republican of Colorado, ing Committee, and export says he will offer an amendment on

promoters led by Senator H. John the floor that would weaken the provision. The House version permits a number of exceptions.

• East-West trade - The Garntual veto over licenses for strategic goods, even when exports are destined for Western countries. The idea is to prevent diversion to the Soviet bloc. The House bill would reduce some of the licensing rebly play an important role when a quirements but would provide House-Senate conference commit-funds to lift the expertise of Commerce Department inspectors.

• Extraterritoriality - The House bill would curb the controversial extraterritorial reach of the law by requiring a joint resolution Don L. Bonker, Democrat of of Congress before the president could apply sanctions against foreign companies. Action against Eucompanies that violated President Ronald Reagan's han on supplies for the trans-Siberian pipeline brought this issue to the ore in the summer and fall of 1982.

The Garn-Heinz bill goes in the other direction, authorizing the president to impose import as well as export sanctions. A foreign company that violated American sanctions would be barred from selling in the United States.

• Enforcement — The Senate measure makes the U.S. Customs Service the principal enforcement agent, taking the job away from Commerce. The House bill keeps

MANCHESTER, New Hampshire — The New Hampshire Democratic primary campaign wound down Monday with a winter storm threatening and nervousness growing in the camps of Walter F. Mondale and Senator John Glenn of

appeared confident, however, as weekend polls by his own campaign and news organizations showed him moving within striking range of Mr. Mondale, the front

By David S. Broder

Mr. Mondale defied a New Hampshire jinx and for the second straight day virtually left the state to his rivals. After spending most of Sunday in Maine and Vermont, he returned to Washington on Mon-

A final weekend of polling by The Washington Post and ABC News showed Mr. Mondale's lead over Mr. Hart slipping to 7 per-centage points, with Mr. Glenn another 10 points back. Dotty Lynch, the Hart campaign pollster, said Monday that on the basis of her own latest data, "it is possible that we could finish within 10 points" of Mr. Mondale. But the possibility of an upset

was once again discounted by Jeanne Shaheen, Mr. Hart's New Hampshire manager. "Mondale has just too big a lead," she said. "We've had a lot of movement, but I don't think we can close the gap in

Cathy Rodgers, Mr. Mondale's campaign manager here, and Jerry Morris, Mr. Glenn's state press secretary, both said that weekend canvassing had confirmed 'some pickup" in support for Mr. Hart, who has been doing well since his surprise second-place finish behind Mr. Mondale in the

Iowa precinct caucuses a week ago. A wide variety of pre-lowa polls had shown Mr. Mondale with at least a 2-1 lead over either Mr. Glenn or Mr. Hart. But the history of New Hampshire primaries has been one of close finishes.

In 1980, President Jimmy Carter had a 9.8-point victory over Senator Edward M. Kennedy of Massachusetts, with Governor Edmund G. Brown Jr. of California much further back. In 1976, Mr. Carter had a 5.7-point margin over the runner-up, Representative Morris K. Udall of Arizona, with six other candidates trailing. In 1972, Senator Edmund S.

Muskie of Maine defeated Senator George S. McGovern of South Dakota by 9.3 points, with six other established candidates drawing votes, In 1968, President Lyndon B. Johnson defeated Senator Eugene J. McCarthy of Minnesota by 7.7 points.

In the last four Democratic contests, the average margin of victory has been just over 8 points. On the other hand, in the two contests where the margin was smaller than expected for the winning candi-dates — for Johnson in 1968 and

# Nicaragua Challenging UN Human Rights Unit

By Iain Guest nal Herold Tribune

GENEVA - The Sandinist government of Nicaragua has threatened to oppose the extension of a United Nations group on "disap-peared" people if the group contin-ues to demand an explanation of the fate of people who vanished during the regime of Anastasio Somoza, who was overthrown in the Sandinist revolution of 1979.

The Nicaraguan demand follows the publication in Geneva of the group's latest report to the UN Human Rights Commission.

Nicaragua is said to be insisting on a weaker mandate for the group, and even suggesting that its report be private. It also has proposed that the group not accept information from the independent Nicaraguan Commission on Human

But relatives of people who have vanished are calling for a tougher, more critical approach.

The UN group has received thousands of reports from human rights groups and has forwarded 6,605 cases to 24 governments for have been clarifled by government

The source of the most recent allegations is understood to have been the independent Commission on Human Rights, which told the UN group that many of disap-peared Nicaraguans were Miskito Indians who were arrested in 1982

Arelis Parrales, a Nicaraguan delegate, described the Managua panel as "politically motivated." and said that the UN group should refuse to accept its submissions.

and have since been detained in-

The Nicaraguan protest is seen in Geneva as ironic because human rights activists have regularly denounced U.S. support for the counterrevolutionaries, and dismissed U.S. contentions that the human rights situation in Nicaragua is worse than it was under Somoza.

In addition, the Sandinists have communicated with the UN group more than most other governments

Pledge on Human Rights

Foreign Minister Dante Caputo of Argentina pledged Monday in Geneva that his country would defend human rights around the world and said that Argentina's Reuters reported.

### U.S. Congressman Urges Reliance on Military Reserves

Washington Post Service WASHINGTON - The U.S. military must increase its reliance on reserves or face a personnel shortage by the end of the decade, according to Representative Les Aspin, Democrat of Wisconsin.

Mr. Aspin, chairman of the House Armed Services Subcommittee on Military Personnel and Compensation, released a study showing that by 1989 the Defense Department will have to recruit more than one of every three 18and 19-year-old males not in college to meet current goals.

Greater use of the reserves, he said Sunday, could alleviate that challenge while reducing the Penta-

gon budget.
"We could just accept a much lower level of defense manpower," Mr. Aspin said, "but our commitments are not decreasing. Additionally, we could rely heavily on the [National] Guard and reserve, the traditional American reliance on the 'citizen soldier.'

Mr. Aspin released a six-point proposal that he said would improve the skills of reserve and National Guard units. The proposals include finding a more uniform and objective way to measure the fighting ability of various units. giving more modern equipment to reserve units that show improvement in military skills and increasing the number of full-time person-

# Labor and the Court

escape for companies stuck with high-cost labor contracts? The Supreme Court has now ruled that union contracts can indeed be abrogated as part of an effort to save a company in a "Chapter 11" reorganization. But organized labor argues that bankruptcy is becoming a ploy for union busting. It wants Congress to exempt union contracts from renegotiation.

Employers might indeed be tempted to use bankruptey to deny labor the fruits of collective bargaining. But the Supreme Court had reason to conclude unions are as well protected from abuse as other creditors. If reorganization in bankruptcy is to work as intended, to save both jobs and creditors' assets, lahor

contracts should remain part of the process.

When Continental Airlines asked a bankrupley court for projection against creditors last September, its union contended that the company's main goal was escape from its labor contracts. The unions lost the argument in court, but their case struck a political nerve and the new Supreme Court decision is not likely to east the pain

The justices said that a "somewhat stricter standard" should be applied to collective bargaining agreements than to other business contracts. But it rejected one lower court's view that labor contracts could be set aside only as a last resort. The Supreme Court instructed judges to strike a balance of equives in deciding how much sacrifice should be expected of various creditors, including unionized workers, to keep a company affoat,

The court relied on its reading of existing law. But a deeper logic supports the judgment. Jobs can be preserved only if a company con-tinues to operate. If wages are exempted from

Should the bankruptcy laws be a path of cape for companies stuck with high-cost lacreditors for their concessions. In the airlines, where labor contracts represent most of the uncollateralized debt, exempting unions would more quickly lead to liquidation rather than reorganization.

The unions say they can be asked to save jobs with voluntary concessions. But saving jobs is not always a union's first concern. At Continental, the national unions were more worried that wage cuts would set a precedent for renpening contracts with other airlines. That may be why union members at Continental were given no chance to vote on the company's last offer before it chose bankruptcy.

Labor, sensing that its best shot in an elecuon year lies in a quick vote in Congress without even committee hearings, has pro-posed an unworthy deal. It would support conservatives who want to remove bankruptcy protections from consumers if they will let the House rush its vote on the labor amendment. The unions would then lobby to have House and Senate conferees accept the amendment, bypassing a direct test in the more bostile

There may indeed be room here for constructive reform. Unions might be required to let members vote on proposed concessions when their employer contemplates bankruptcy. Unions might be assured an expedited judicial review of concessions drawn from them by bankruptcy judges. But these ideas need discussion. No worthy reforms can come out of the backroom maneuvering now under way. The House leadership should hold out for a more deliberate process.

- THE NEW YORK TIMES.

# A UN Role in Lebanon

**Relief for Social Security** 

Less than a year ago Congress enacted a bipartisan reform program to put the Social or so from now, the trust funds should have sufficient reserves to make it through the tight-

Pretty much on schedule, a call has gone up to bring the United Nations into Lebanon. It tends to happen at about this time, when Western enterprise has fallen on hard times and a face-saving way to avert greater collapse is needed. At the Security Council, a French resolution is being worked on, It would extend —in the beginning, at least to the Beirut area and to Palestinian refugee camps — the mission of the 6,000 UN soldiers who have been keeping the peace in southern Lebanon since the Israeli invasion of 1978.

If the mandate of the UN force is to be altered, however, the agreed purpose will not be simply to replace the multinational force, whose components (American, British, French, Italian) are now leaving on their respective political calendars. The purpose of the multinational force — to strengthen the Ge-mayel government and, meanwhile, to try to inch it toward power-sharing—has been over-taken by the cruel events of the last few weeks. The only UN peacekeeping strategy that would be politically feasible now would necessarily have to be approved by Moscow, which otherwise can and assuredly will block any change. Such a strategy will require substantial slices of Lebanese national power to be allotted to the Moslems and Druze. Syria's and the

Security retirement system on sound footing

for the foreseeable future. Now comes a report

from the Committee on Economic Develop-

ment, a national business policy group, warning that Social Security may be in trouble

Before you pick up your pen to dash off a

worried letter to the president or Congress,

you should know that the CED's report is not

based on any new analysis or insight. The

projections it cites are taken from last year's

report of the Social Security Trustees, and are

essentially the same as those used by Congress

and the bipartisan Social Security commission

in framing the reforms put into law last March.

True, things have changed somewhat since

that time - but not in the way that the CED's

report would suggest. They have gotten better.

year's reforms is that, for once, they were not

The reform package was designed to see the Social Security trust funds through this decade

under a very pessimistic economic forecast -

unemployment remaining above 10 percent

Of course, the economy is already much

better than that. And, as the Congressional Budget Office's new projections show, even if the economy heads back into a recession a year

based on a rosy view of the future.

barely outpacing inflation.

The important thing to remember about last

before the end of the decade.

Soviet Union's clients in Lebanon. The Reagan administration can see the slippage in its own position in Lebanon, but it is not eager to have the United Nations expand its role in a way that will accord the Russians the sort of larger and formal say in Middle East affairs that a revised UN mandate would imply. It continues to bope that its friends in Lebanon will somehow not have to pay the full political cost of their misfortune.

In New York, nonetheless, U.S. officials have entered into the bargaining over the terms of the French resolution. They are, for instance, resisting the Soviet effort to go beyond the evacuation of the multinational force and to force the U.S. Sixth Fleet out of Lebanese waters as a condition of hringing UN forces into Beirut and the Palestinian camps.

In the best of circumstances, however, the United Nations is bound to come to Beirut only slowly. There is widespread agreement that there must first be a Lebanese cease-fire and the establishment of some Lehanese political authority or consensus, in addition to Security Council agreement on a peacekeeping mission. In brief, there must be some kind of peace to keep. Poor Lebanon remains a long

est period before legislated tax increases begin

# Reaganism Opens Rifts Among U.S. Classes

WASHINGTON — Social historians will note that at the mid-February gala for Princess Grace, an event the press described as "a glitz blitz of spectacular proportion" attended by notables from the president and first lady down — or up, depending on the rank accorded the royalty present — a Secret Service agent watched

guests pass through a metal detector.
"It takes a heavy chunk of gold to set off this machine," he said. Gold there was, and diamonds, sapphires, rubies and other precious stones, in what was reported to be the most conspicuous display of wealth seen here since President Reagan's inaugural festivites.

Among the touches provided at this charitable Among the fourness provided at this charitable \$5,000-a-ticket function for the Princess Grace Foundation, according to a Washington Post reporter who covered the event, were toilet bowls filled with chopped carnanons. "After they were flushed," she wrote, "a hotel maid sprinkled more fresh flowers in them."

Perhaps that glimpse into the mores of Washington in the mid-1980s represents nothing more than one way in which the rich and powerful, or some of them, anyway, occasionally choose to spend their time in this affluent world capital. But it does convey another message that bears on the presidential stakes of 1984: The way in which economic class lines are lengthening during the Reagan era.

Two other recent events have dramatized that condition and guaranteed sharper political dehate in days to come. One was the Census Bureau report of the sharp increase in the number of Americans living below the poverty level. The other was the Supreme Court's landmark 5-to-4 ruling affecting union contracts. It gives compa-nies filing for bankruptcy the right to cancel labor union contracts without having to demonBy Haynes Johnson

strate that those contracts threaten the compa-

nies' ability to survive.
U.S. labor unions have been in trouble for

years. Their membership is declining as a propor-tion of the work force, their once-mighty political power wanes, their standing with the public sinks lower. The ruling deals them another major blow after they sustained a series of setbacks threatening the very course and nature of labor-managemenı relations.

Since the strike 312 years ago of U.S. air controllers resulted in replacement of union members by nonunion personnel, labor unions have been reeling. Faced with threats of plant closings, unions have accepted lower wage levels, decreased benefits and altered work rules, Companies have learned that merely raising the prospect of filing for bankruptcy often enables them to win significant union concessions.

Now, with the Supreme Court ruling, companies can use bankruptcy as a device to abrogate contracts once thought inviolate. Unions are faced with the harsh knowledge that protections they believed secure for their members are no longer so. And U.S. workers, after decades of moving up the economic ladder, find themselves having to accept lowered standards of living.

They also know, as one of the shrewdest observers of U.S. labor-management relations remarked, that the threat of using bankruptcy "has cast a shadow over the bargaining table."

Arnold Webber, president of the University of Colorado and a former special assistant to President Nixon and executive director of the Cost of Living Council during the Nixon years, makes several thoughtful points about labor-management relations after the court ruling. How man-agement interprets the current situation is ex-tremely important, he says, especially with unions clearly weakened and on the defensive. His advice to companies is: Don't overplay your hand. Understand that unions have had, and will continue to have, a useful, proper place in this complex democratic society. Further, understand that what unions find they cannot win at the bargaining table they will try vigorously to resolve through the political arena. And, he adds, all of this "has a tincture of a-

class issue to it."

Which is exactly how unions are responding. Kenneth Young a key AFL-CIO strategist, says the labor federation has been warning its members about dangers inherent in a second Reagan term. He cites the Supreme Court as an example.

In four more years, given the age of the present justices, Mr. Reagan could appoint as many as five new members to lifetime terms on the bench, thus putting his stamp on the U.S. judiciary for

the rest of the century.

"You can be sure that we're going to make the point even more sharply," Mr. Young said, "about what can happen in a second Reagan term when he doesn't have to play the moderation game and can do what be really wants,"

All of this suggests that the 1984 election promises to be the most polarizing in memory, with voters dividing along economic and racial

If scenes of the "glitz blitz" in Washington reflect the new political currents, people at the top are displaying behavior and a social coniousness reminiscent more of imperial Rome than of democratic America. They are growing. ever more remote from those at the bottom:

# Some Prescriptions for Europe's Present Danger

This is the second of two articles.

BRUSSELS — In 1952 at Lisbon the European ailies agreed they could not match Soviet conventional forces in Europe but instead would offset them by relying chiefly on the U.S. nuclear deterrent, which then was almost a monopoly.

But hy 1967, that monopoly had eroded to near parity, and it was feared that the strategy of massive retaliation, which depended on an overwhelming U.S. edge, was no longer credible. The Russians could try lesser forms of intimidation or aggression to which a massive nuclear strike would be a totally inappropri-

Therefore, NATO changed to the strategy of flexible response. The new strategy was designed to provide not just one alliance response to aggression — a strategic nuclear one — but a range of possible reactions proportional to the challenge. The range included conventional defense, a range of theater responses and a general strategic nuclear option. Conventional forces, theater nuclear forces and strategic nuclear forces became the triad on which NATO depends for deterrence,

Over time and in the face of the continued Soviet buildup in all three of these areas in the 1970s, however. each component of the triad devel-

oped vulnerabilities. The United States is taking steps to restore balance on the strategie level,

R OME — President François Mit-terrand's proposal for a Europe-

an space station is raising consider-

But now Mr. Mitterrand has point-

The French proposal is relevant for

two reasons. First, because it is in-

creasingly acknowledged that a nu-

clear arsenal not complemented by a

space system loses most of its effec-

tiveness. Satellites are vital for com-

municating with nuclear forces, for

targeting missiles against the enemy

and for ensuring early warning of an attack. Therefore the two superpow-

European unity.

European one.

By David M. Abshire

including introduction of the Trident niscent of General Heinz Guderian's submarine, the B-1 bomber and the MX missile, and pursuit of meaningful arms negotiations to develop strategic stability.

The theater nuclear problem is now being addressed — in the absence of the preferred response, negotiated reductions — by the deploy-ment of Pershing-2 and cruise

Today it is the third, conventional leg of the triad that has not been properly shored up. Ammunition stocks are not adequate, or sufficientstandardized between forces, and there are insufficient reserves capable of quick mobilization. NATO's air defense also needs improvement.

If the two world wars tell us anything, it is that conflicts start at the lower, not the highest, levels. A "nuclear Pearl Harbor" is not the greatest danger, but rather an updated version of the summer of 1914. If the allies are not strong enough at the lower, conventional level, the Russians could miscalculate that they can make lim- of conventional forces. ited moves in a crisis and produce faits accomplis. They may equate conventional military weakness with weakness of resolve.

Soviet doctrine and military behavior, such as the introduction of new operational maneuver groups, seem to envision just the kind of

... and Some for Those of the Future

tactics in World War II. But that conflict was not quickly resolved, and we cannot afford another - conventional or nuclear. Neither can the allies in Europe he placed in a position of having to yield to Soviet in-

At a meeting in December, NATO defense ministers recognized the need to improve conventional defenses as a sort of insurance policy

The ministers are committed to shoring up conventional defenses and making them more sustainable. NATO then could rely on an enbanced and credible conventional force backed up by the threat of possible later nuclear recourse, rather than on the possible early use of nuclear weapons for deterrence. Newly available technologies - so-called smart weapons and better surveillance techniques --- provide additional ways of reinforcing deterrence through improving the performance

Beyond strengthening the convennonal leg of the deterrent triad, NATO is attempting to avoid war by miscalculation through other means The Stockholm conference on confidence- and security-building measures is designed to reduce the chances of war by mistake or surprise short, quick, surprise conflict remi- in Europe, and NATO bas intro-

duced a package of meaningful mea-sures that would provide for more. military "preparedness" or openness.
The Washington-Moscow hot line is being upgraded and measures for better crisis management are being

Most important, NATO is remaining true to the goal for which it was originally established — the prevention of war in Europe. It pursues every avenue for relaxing international tensions and improving relations with potential adversaries.

Many people say that the leaders of the Soviet Union do not want war. I believe that. But no one in the summer of 1914 wanted war either. The lesson of Sarajevo is that we must ensure that war comes neither by calculation nor by mistake,

The writer, the permanent U.S. representative to the North Atlantic Treaty Organization, contributed this comment to the International Herald

shifted stair people into and out of New Hampshire, as their needs dio rated, Mr. Campion just stayed.

Joan and Walter Mondale built that same kind of personal relationship with New Hampshire voters on their visits. She wrote hundreds did not built the control of the control notes to people they had met. But from early morning to late at night, it was Mr. Campion and his native-born deputy, Cathy Rodgers, who were here to take the phone calls and build the links.

Mr. Campion's work comes from the New Hampshire operatives running rival campaigns. Jeanne Shaheen, Senator Gary Hart's highly esteemed manager, says: "Chuck has done a good job. He's made no mistakes He's made a lot of friends for himself and his candidate. And he's gotten the job done."

# LETTERS TO THE EDITOR

### **EC Deserves Better**

Regarding the report "Unity in EC Remains Just A Dream" (Feb. 23):

If Paul Lewis would at least have given some credit to the European Community's considerable achievements - unparalleled in the history of Europe - his lamentations about some of the EC's present difficulties might have made more sense.

Instead, in his eagerness to criticize and ridicule. Mr. Lewis produces a bad caricature of an admittedly serious situation.

> NICOLAAS GROENHART. Brussels.

Mr. Lewis explains that European unity remains a dream, since language differences prevent barbers, bakers, carpenters and plumbers from moving around the European Community; since the percentage of "European" Europeans has dropped dramatically between 1973 and 1983 (from 30 percent to 29 percent!); and since on busy days there are still long queues at the European Community

We agree that the EC is facing urgent political problems, but Mr. Lewis fails to address these problems, nor does he provide any insight into

Allow us to make two points: First, an increasing European unity under the pressure of common difficulties is a likely scenario for the near future of European integration (remember the way in which the United States became united?). Second, the failure of politicians to step up the speed of jet to Colorado" for a string bell

the truce declared by Theo Habicht, exiled leader of the Nazi party in Austria, Vienna was seething with rumors [on Feb. 27] of an impending invasion of Austrian Nazis from Bavaria, and the massing of Czechoslovak and Italian troops on the frontiers. These rumors were accompanied by talk of the return of Archduke Otto as emperor of Austria and Hungary. At "zero hour," noon [Feb. 28], when the so-called Habicht ultimatum expires, the scheme of the Nazis is to appear in streets of towns throughout Anstria wearing forbidden Nazi badges. This would leave the government in a quandary as to how to deal with thousands of Nazis who would break the law.

serving a foreigner can put snap mto service that for ordinary Russian customers is usually dilatory

It is one of the few aspects of the system that surs ordinary Russians to vocal dissent, and lately the Kremlin has been gearing up to do something about it.

A few days before Yuri V, Andropov died, the Politburo issued a decree authorizing a plan designed to spur "the interestedness" of service establishments "in fully meeting the population's requirements."

The plan is to take effect July 1 and will seek to improve performance by giving enterprises new latitude in matters like staffing, pay and profit retention.

Like many of the economie initiatives undertaken in Mr. Andropov's 15-month tenure as the Soviet leader, the approach is cautious. At first, the program will be put into effect on an experimental basis in eight districts of the Russian federation, largest of the country's 15

The program was among those cited by Konstantin U. Chernenko, the new leader, when he pledged to support the economie measures introduced by Mr. Andropov.

The take-home pay for customer-service jobs is no worse than in most blue-collar jobs, from \$190 to \$315 a month. But the shortages of working materials and the ill temper of customers standing in their fourth or fifth line of the day contribute to the demoralizing atmo-

# **NATO Debate on Conventional Arms** Spurs West Germany to Discuss Shift

By Joseph Fitchett

MUNICH - West German leaders - who have long been uneasy about public discussion of a conventional war in Europe have picked up on the renewed debate in NATO about the use of cooventional arms and are losing their reticence to talk about such

The debate that has started in West Germany is low-key compared to the political confrontanons and demonstrations last year over NATO's new nuclear missiles. But the discussions reflect the search by West German leaders for a new oational consensus on defense, one that would prevent the opposition Social Democrats from becoming more critical of the strat-egy of the North Atlantic Treaty Organization.

The postwar West German vision of deterrence has been that any military engagement would quickly escalate in nuclear exchanges, a prospect so horrible that, according to elassic beliefs, war would never be initiated by the

In debates inside NATO over the years, the West German attitude has been in resist any shift away from heavy reliance on nuclear deterrence, any move that might, in the words of an experienced diplomat, "make Europe safe for conventional war."

Now, however, NATO leaders recognizing that the strategy of quick use of nuclear weapons is and therefore perhaps less credible in the eyes of Soviet planners - are moving to bolster conventional de-fenses so that NATO could resist a Soviet attack for weeks without resorting to nuclear retaliation.

Defense Minister Manfred Wörner of West Germany, speaking for his government at a recent "improvement of our conventional hannes Steinhoff, a Tormer German Pact attact forces has first priority" for Air Force commander who was pants said.

NATO. Advanced electronic systems that give new speed and precision to weaponry, be said, "offer us for the future a realistic perspective for strengthening the conventional combat power of our forces more

This approval for strengthened conventional deterrence was echoed by Horst Ehmke, deputy leader the Social Democrats. Mr. Ehmke also added a call for "further development of NATO stratein conventional warfare. And he stressed the opposition party's interest in more Western arms

Both West Germans spoke at a conference earlier this month in Munich sponsored by the German military affairs monthly. Euro-

päische Wehrkunde. A major problem in any shift in strategy is the cost of credible conventional forces. European military budgets have benefited from the S. nuclear umbrella, largely paid for by American taxpayers.

Another difficulty is that the defense tactics with conventional weapons inevitably would involve NATO's losing some territory in West Germany and counterattack-ing into Warsaw Pact countries. Bonn's official position — under governments of both left and right - calls for NATO to hold West Germany's eastern borders, without counterattacking across them. A switch in emphasis on conven-tional weapons would not elimi-

nate the need for ouclear weaponry, noted Karl Kaiser, a prominent West German analyst. He was the author, along with three other West German specialists, of a widely no-ticed article last year in Foreign Germany to avoid painful discussions of conventional warfare in Europe

At the Wehrkunde meeting, Mr. Kaiser said that West Germany is finally accepting the need for a new mix of nuclear and conventional deterrence and also the necessity to invest in sophisticated conventional weapons, mainly because West German forces needed them to compensate for declining manpow-

Already, Mr. Wörner reportedly s begun to advocate in meetings

controls proposals in both the conventional and nuclear fields.

also chairman of NATO's military committee. committee.

General Steinhoff, speaking at an earlier conference in London sponsored by The Economist magazine, said that conventional rear-mament by NATO will be branded "offensive" hy many West Ger-

West German sensitivity is acute because any Western counteroffensive would involve East Germany, making a battlefield of both Germanies. "Those are Germans on both sides of the front," said a Social Democrat parliamentarian, Karsten D. Voigt. Most West Geradopting military doctrines clearly threatening East Germany and liable to harm the improving ties between the two Germanys, be noted.

In calling for a change of NATO doctrine. Social Democrats such as Mr. Ehmke and Mr. Voigt want to ensure that any new conventional strategy is closely linked to new Western initiatives on arms control and strictly confined to a defensive

A major factor in making conventional defense reassuring to West Germany is France's new interest in supporting NATO's conventional strategy instead of relying entirely on their nuclear

# European Study Says Acid Rain Threatens Stained Glass Objects

GENEVA - A study prepared for the UN Economie Commission for Europe says acid rain is having a "disastrous effect" on Europe's stained glass treasures and could destroy them. It says more than 100,000 stained glass objects, some of them more than 1,000 years old,

According to the study, stained glass objects were generally in good condition up to the turn of the century. But the report warns that in the last 30 years the "deterioration process has apparently accelerated to the extent that a total loss is expected within a few decades, if no Scientists believe acid rain occurs when emissions from coal-

burning factories and power plants are transformed into sulfuric and nitric acids and fall to earth Glass dating from the 8th to the 17th centuries is particularly

indangered because of the process used in its production, the report says. Sulfuric acid has an etching effect on this stained glass. The surface corrodes, and the resulting salts form a chalky crust that eccelerates the decomposition process, allowing the paint to peel off.

The glass substance finally splits and disintegrates into minute sarticles," the report says.

Sulfur compounds also seriously affect leather and paper objects,
he study found, "Old organically-treated leather reacts with sulfur

dioxide as does paper with the result being cracks and embrittlement. Paper produced after 1750 seems to be particularly susceptible to

# ARTS/LEISURE

# Jimmy Cliff: Tuning People Into Reggae

By Michael Zwerin International Heraid Tribune

 $P_{\text{sessed with roots. Jimmy Cliff}}$ - prohably the biggest reggae star remaining after the death of Bob Marley - has been chasing after his own in a disorderly fashion.

He has recorded in the country music hastion, Muscle Shoals, Alahama; his first European tour in 1968 consisted of as he put it. "about two-thirds American black music and one-third reggae": he once hired Chris Kimsey, the producer of the Rolling Stones' record Tanoo You," because he thought "I need more of an English ear": his popular soul hallad "Many Rivers to Cross" was recorded by Linda Ronstadt, Joe Cocker and Harry Nilsson. And his current hit single "Reggae Night" (from "The Power and the Glory," CBS) is more funk

than reggae "Reggae Night." went nowhere when released in the United States last fall. But this year it began to hit in Europe. Currently No. 5 on the RTL chan in France, No. 3 in Italy, and moving up in both places, it is one of those annoyingly simple, repetitive, catchy melodies you almost resent for having so insidiously invaded your head.

'I made it with a motive." Cliff said last week, on a promotional tour of France, Italy, Spain and the Neiherlands, "to open a door, It's a reggae topic with American rhythm. Now I have a lot of listeners I didn't have before. People are tuned into reggae that weren't nuned in before."

Born James Chambers in St. Catherine. Jamaica. be quit school and moved to Kingston in 1962. Working with the Chinese-Jamaican Leslie Kong, he had his first local hit, "Hurricane Hattie." But he wanted to be an international star, moved to London in 1965, went into the studios and recorded with people like the Spencer Davis Group. In 1970, Cat Stevens had an enormous success with his song "Wild World."

Cliff brought reggae to the attention of the world in the early 1970s. playing a renegade Jamaican singer and recording the soundtrack for Perry Henzell's film "The Harder They Come." His performance was widely praised, though the film attracted (and continues to attract)

only a devoted cult following. He could identify with the character: "He was a rebel, a renegade. I had never acted before but I used to go to four movies a day when I the Egyptian Antiquities Departlived in London and I always want- ment.

ed to get into movies. When Hen-zell asked if I thought I could do it, l said: 'Sure. l can do anything.'

Touring North and South America. Japan. Western and Eastern Europe and Africa, he became a key figure in a unique phenomenon - Jamaica is the only Third World country to have exported its culture to a mass international audience. Just about every major rock and pop act now includes reggae feel somewhere in their material. The "hlue-eyed reggae" of The Police, this year's top rock band, according to Rolling Stone magazine, is the

"Reggae music is the cry and the joy of a people." Cliff's quiet confi-dence is impressive. He has a kind of personal power based on serenity rather than aggression, he tries to communicate with intelligence more than rhetorie. "It is born out of struggle and pressure, out of a condition where people need acceptance, love, respect and justice, "I feel alien in the Western hemi-

sphere. [He moved back to Kingston in 1974.] Africa is my natural environment. My whole way of life, my culture was denied me when my ancestors were shipped to Jamaica I wasn't taught anything about African culture in school. They call us last year, when all of a sudden he useful thing I've ever done. Reggae be had to survive as a hlack man in cluding Barbados and Antigua. "I Western society. I mean bad-good, understand their point," he says,

He considers Africa "my natural environment," and he has played Nigeria, Zimbabwe, Senegal and Lesotho and traveled "north, south, east, west — all over Africa, not performing, just absorbing." Cliff got himself into a lot of hot African water after be toured South

C AIRO — Egyptian archaeologists have unearthed five

iombs from the reign of Ramses II,

believed by some to have been pha-

raoh when the Israelites fled Egypt,

The superstructures of the tombs were found at Sakkara, about 10

miles (16 kilometers) south of Cai-

ro and three miles from the site of

Memphis, the ancient Egyptian capital, according to Mahmoud

Abdel Razik, general manager of

officials said Monday.

Jimmy Cliff: Chasing after roots.

They think that the system can get political mileage out of the fact that Jimmy Cliff is black and they let him play for integrated audiences. But I don't see anybody picketing Boeing for selling 747s to South African Airlines, and they should look at the content of my work.

"I think my trip to South Africa

portion of the tombs.

Sonleiado was one of them.

The success of this firm, which The discovery is important his-torically because it had been that, according to Tawfik, chairthought that members of Ramses' man of the archaeology departbear their original colors after 3,000 years" and are of superior quality to those usually found in He said the team was still excavating the site and had so far found no mummies. Razik said mummies normally were buried in subterranean chambers reached by shafts some 15 to 20 yards from the main

# Exporting the Sun in Provençal Fabrics

By Hebe Dorsey

T) ARIS - Brigitte Bardot discovered them in a small Saint-Tropez shop. Jacqueline Onassis decorated ber country place with them. Pierre Cardin bought 800 meters of them for his Cannes villa and Picasso used to wear shirts made of them.

The story was one of humble fabrics. But suddenly, thanks to Souleiado, a major exporter of Provençal fabrics, naive, cheerful country prints are making a big comeback, even in Paris where they were not exactly chic. In the United States, which accounts for 22 percent of the \$5.3-million business. Souleiado is a hit, both at Bloomingdale's and in 18 Pierre Deux boutiques coast-to-coast.

Souleiado - the name in Provençal means "sun ray bursting through the clouds" — is owned by Charles Demery, who built a worldwide empire out of the modest Provençal mouchoirs - or oversized kerchiefs worn by French

peasants at country markets. Based in Tarascon, the tightly knit family includes Deméry, 70, who handles finances; a son, Jean-Pierre, in charge of designing, and two daughters, Regine and Chris-tiane. Demery's second wife, Annie, handles personnel. Christiane, who runs the Paris showrooms and looks after exports, is the spokeswoman for the company

It all started in 1938 when Demery, an engineer by profession, bought from his uncle a small, 18th-century cotton business emness was copying Indiennes — the brilliantly colored cotton paisleys "Reggae music is a cry of the that came to France from India. These became so popular that Louis XIV's finance minister, Jeanning the import and manufacture of the so-called "painted fabrics." This, however, did not apply to this region of Provence, then under pa-pal sovereignty, where many small industries were able to survive.

now includes pretty much everything from home furnishings to fashion, is based on a number of factors. One is a library of 40,000 perhaps in the United States. fruitwood blocks, reportedly the world's largest collection in private hands and second biggest after Mulhouse's Museum of Printed Fabrics. They provide the basic inspiration for the exuberant patterns, mostly flowers, paisleys and geometrics. The color range, originally limited, now takes in at least 250 different hues, including 75 shades of blue.

Christiane Deméry in Souleiado's Paris look

"Color is important." Christiane nut to crack. "Provençal was not said. "A dreadful pattern can popular bere," according to Chrischange completely if you change tiane. "We've had to make it palat-

soulciado fabrics are no longer prefer exotic folklore. Whereas hand-printed with vegetable dyes, abroad, mainly in Japan and the as in the 18th century. But Deméry, United States, Provençal is so popular that we can hardly keep up who prints a million meters a year, ular that we can hardly keep up has developed synthetic dyes that with the demand." look very much like the real thing.

The Demerys also had a knack of the Souleiado image in Paris is Jean adapting to different markets. Dive, a well-known decorator. Pa-Strangely enough, Paris was a hard risians are afraid of the rustic ors don't work at all."

Still, according to Dive, "the French are not only conservative, they pinch pennies. They prefer heavy velvets to thin, and thinwearing cottons. We're getting around that one by giving them quilted cottons." Almost everybody, including the

look," he said. "They don't want their Paris apartment to look like

some farm house. They also suffer

from a bourgeois complex which

means they're slaves to their furni-

ture, which is often inherited. They

don't believe in putting percale over a Louis XVI chair. So they end

up sacrificing their ambience to

# earing Price Fall, Farmers 1 U.S. Seek Record Output

By H.J. MAIDENBERG New York Times Service

EW YORK - Unless a climatic disaster like last year's drought in the grain belt occurs this season, the growers of the three major U.S. crops, corn, wheat and soybeans, will try to set production records. If they seed, it would cheer inflation-watchers and bring gloom to the inistration just before the November elections.

It is usual, the grain and oilseed markets did not learn the near's planting intentions from the farmers themselves or the entire the private the private the private the private the second to the seco

ernment, despite the pains that the Agriculture Department is at this time of year to survey and report on what and how is the grain and cotton farmers plan to grow. Rather, grain

Washington has

chants and traders monifertilizer and other farm mical sales, the best meaof what farmers intend to

extended the deadline o does E.S. Finley, presifor the payment-inkind program.

t and chief executive offiof International Commod-Export Corp. He is a ing fertilizer exporter, but

tudies domestic sales for clues to overseas market trends. Our latest figures show that farmers will be trying to maxi-coutput this season in order to offset the expected decline in ket prices," Mr. Finley said. "While current grain and bean es are somewhat higher than a year ago, farmers apparently not counting on this situation to obtain at harvest time." pecifically, he expects fertilizer sales this season to total 47 ion tons, up 7 million from last year. This would make 1984 best sales year for the industry since 1980, when farmers used nillion tons.

st year's low fertilizer use resulted not from the severe drought that started in July hut from the "payment in kind" reduction program Washington created to reduce burdene surpluses and thus aid hard-pressed grain and cotton

Based on the fertilizer sales figures and, of course, weather nitting, we expect this year's corn crop to come in at eight on bushels, compared with 4.2 billion in 1983 and the near-ird 8.3 hillion the year before, when the weather was good,"

e also forecast a total wheat crop of 2.25 hillion hushels, ad on increased sowing of winter wheat last autumn. Last on's total wheat output was 2.4 hillion bushels, with the ing crop reduced by drought. In 1982 a record 2.8 hillion hels of wheat were produced. Mr. Finley, who has an enviable rd as a crop forecaster, projected a soybean crop of two on bushels for this year, compared with 1.5 hillion in 1983 a record 2.2 hillion the year before.

verseas, he expects China to continue to be the biggest orter of fertilizer as Beijing strives to increase its rising level od production. "India is also using more imported fertilizers the same purpose, but Latin America continues to be a populating market because of foreign-exchange shortages," Finley said.

ierman L. Levin, agricultural research chief at Paine, Web-Jackson & Curtis in Chicago, said: "Farmers will certainly heir best to raise production this season, no matter what they are as their planting intentions. The soybean and cotton rers have already confounded everyone by giving figures rating that, somehow, 5 million acres have vanished in the

ne government also appears concerned that farmers will try \_\_\_\_al. Thus. Washington extended the deadline for farmers to : up for this year's 10 percent planting set-aside program to Th 16, from Feb. 24,

Trexample, corn growers who sign np will be assured an ige support price of \$3.03 a bushel if they leave 10 percent of land idle. Last Friday the average cash corn price was \$3.30 shel, and that price could plunge if a huge crop is harvested. any corn growers who do sign up will try to "grow" the lost in the futures market, Mr. Levin said. He explained: "The age corn grower works 500 acres (200 hectares). If he agrees is 100 bushels per acre. Many farmers have indicated that intend to buy at least one 5,000-bushel corn futures contract

-ake up for the lost yield." · so, Mr. Levin added, the farmers would be hedging. If the es price rises, they would gain income on their contracts that I offset their reduced yield. If the futures price drops, ever, their loss could be softened by the Federal support

# For Anheuser, Beer Isn't Traveling Well

LONDON - Anheuser-Busch Inc. is the world's largest hrewer. It commands 33 per-cent of the U.S. market and calls its Budweiser brand "the king of beers."

None of this appears to impress the average German beer drinker.

"There is no demand for any obscure beer hrand in Germany," explains Paul Wendler of the Bonn-based German Brewers Association, recalling Anheuser's 1981 market test in Berlin. Besides, he says, as politely as possi-ble, "the image of American beer is not all that good."

Oblivious to such scorn, U.S. brewers tra-ditionally have all but ignored the overseas market. They generally were satisfied with their home market, which accounts for about a lifth of world demand, and were kept busy gobbling up weaker rivals.

Now, however, only a handful of major hrewers remain, and the U.S. beer market has gone stagnant. Lawrence Adelman, an analyst at Dean Witter Reynolds Inc. in New York, estimates that U.S. sales volume grew just 0.8 percent last year. Imports were the only healthy segment, expanding 9 percent. So Anheuser and, to a lesser extent, Philip Morris Inc.'s Miller Brewing Co. are looking

For St. Louis-based Anheuser, which began to explore the foreign market seriously four years ago, the sales contribution so far is meager. "You can't even find it within the context of the total corporation," says Arthur Kirsch of Drexel Burnham Lambert Inc.

Anheuser notes that the dollar's strength has made its beer pricier in overseas markets. But industry analysts and executives say the slow progress also reflects Anheuser's late start, its choice of low-risk markets, the lowly reputation of American beer, a legal tussle with Czechoslovakia and, at least in Berlin, the company's marketing style.

Nonetheless, the "king" has had some suc-

cess. In Canada, where Budweiser is hrewed under license by Labatt Brewing Co., an-

A bottling line at Heineken's brewery in Zoeterwoude, the Netherlands. Heineken is among Anheuser-Busch's main rivals for foreign markets.

beuser claims its beer has become "one of the top 10 brands" in just three years. When Miller was introduced in Canada last year, however, it quickly overtook Budweiser and now accounts for about 7 percent of the market, compared with Budweiser's 4.5

In Japan, Anheuser says it remains the No. imported beer. Its Japanese partner, Suntory Ltd., is scheduled to begin hrewing Anheuser beer in Japan this year. There, too. however, heavyweight competition is on the way: Kirin Brewery Co., Japan's largest brewer, is preparing to begin production of Heineken beer under license from the Dutch

Other major markets have proved tougher for Anheuse

Among the toughest is West Germany, a market fragmented among nearly 1,300 hrew-ers, mostly small and local. In Berlin, Anheuser held what it called "a six-month test probe," teaming up with Berliner Kindl Brauerei, a unit of Germany's Oetker Gruppe. The U.S. hrewer concedes that the (Continued on Page 9, Col. 5)

# U.S. Tool Orders Rose 26% In Month, Doubled in Year

NEW YORK - U.S. machine are a long way from over. tool orders in January jumped more than 26 percent from the previous month and were more than double those in January 1983, according to the National Machine Tool Builders' Association. But

shipments fell considerably. Machine tool orders, which slumped severely during the recession, continued their slow recovery in January, rising to \$191 million, the association said Sunday. That was higher than in all but one ment is required to make a recommonth of 1983 and compared with mendation to the president on the \$91.9 million in January 1983. petition by March 14.

"The trend in new orders is finally seeing a true upturn," said Christine Chien, an analyst with Prudential-Bache Securities. "January was one of the few decent months we've percent from the previous January. seen since the industry bottomed out at the end of 1982. We're finally

seeing some capital expenditures.\* She cautioned, bowever, that the products in time to get the sales revenues on their 1983 books and 108-percent increase in orders last month over the previous January their customers' desire to receive was not so startling because orders the equipment in time to get the had plummeted to such a low base

James A. Gray, president of the association, said the recovery is association, said the recovery is January to \$1.12 billion, the high-ut. W.K. Oil Output est level in a year.

The claim relates to costs in-U.S. defenses, petitioned the presicurred so far and interest and dent to impose a 15-percent quota on imports, the level they had in damages, the sources added. A BP statement said it still is willearly 1978. The Commerce Departing to renegotiate.

BP said the £60-million rig is already one year late. British Shipbuilders has a conditional agreement to sell Scott Litbgow to Trafalgar House PLC and is also talking to Bechtel Corp. and Howard Doris Ltd.

Trafalgar is holding talks ly canceled an £88-million rig order with Scott Lithgow, But Trafalgar is oot currently in touch with BP over the future of the rig that BP bas canceled, a Trafalgar spokesman said.

# From North Sea Sets Record Rate

LONDON - British North Sea oil production has reached a record rate of more than 2.6 million bar-rels a day and the value of output is more than £630 (\$925) a second, a report published Monday by the Royal Bank of Scotland said.

The government's share, in taxes and royalties, is more than £900 million a month, the report said. It shows that in January output set a record for the third consecutive month. Average daily production rose 21 percent over January last

January's increase was "to some extent unexpected" because bad weather affected output from the eight fields whose oil is loaded onto tankers, the bank said.

But the 10-percent fall in output from these fields was more than offset by rises in other fields, which send their oil to a terminal in the Shetland islands.

### Japan Vehicle Exports Up

TOKYO — Japanese vehicle exports increased in January to 482,600, up from 473,800 in December and 471,900 a year earlier, the Japan Automobile Manufacturers Association said Monday.

# **Output Rise** Seen by U.K. **Producers**

LONDON — Figures published Monday by the Confederation of British Industry showed that manufacturers' expectations of increased output were now at the highest level since the recession began, an indication of the growing strength and scope of Britain's eco-

nomic recovery. The survey also indicated, however, that the upturn was still limit-

Of the 1,805 companies replying to the CBI's February industrial trends survey, 38 percent expect a rise in production over the next four mooths, and 8 percent expert output to drop. The proportion of firms report-ing order books below normal has

shrunk to its lowest level in at least a year.

Lower demand cootinued to hurt capital goods manufacturers rather

than the consumer sector or the intermediate producers, the group Export order books have also im-

proved, with the chemical industry reporting strongest demand, the survey showed, but export orders remain overall 14 percent below

### Anderson Fired From Continental Illinois Posts

The Associated Press CHICAGO - Continental Illinois Corp., parent company of Continental Illinois National

Bank, said Monday that it would replace its chairman and chief executive officer. Roger E. Anderson, 62, who tarted his career as a trainee at the

bank in 1946 shortly after graduating from college, is to retire after the annual shareholder meeting April 23, the bank said, David G. Taylor, 54, vice chairman and a director, was named to succeed Mr. Anderson as chief ex-

ecutive officer. The board also announced its decision to elect Mr. Taylor chairman after the annual Continental Illinois, the seventhlargest bank in the United States, was caught up in the July 1982 failure of Oklahoma City's Penn

Square Bank, from which the Chicago bank had bought \$1 billion in

# Anheuser's 'King of Beers' Faces Uphill Export Battle

(Continued from Page 7) results were "less than successful." jor projects.

Recalling the effort, a Berliner Kindl executive says the price was too high, well above most premium brands. In addition, he says, the stores - rather than in taverns, where most beer is drunk in Ger-

The advertising showed cow-pokes sitting around a fire guzzling their brew straight from the bottle. Berliners, accustomed to drinking their beer from a stein in the local

In France, a country less known for beer connoisseurs, Anheuser's market test was positive. The American company signed up So-cièté Européenne de Brasseries, a million. unit of BSN, to brew the beer weder icense. After two years, industry Anheuser's Busch brand at just 0.1

The French market is very slow to react to a new brand," says Fabienne Nicod, a marketing executive at the French brewer.

In Britain, finding a partner has proved difficult. For two years, An-heuser held talks with Allied-Lyons PLC without producing an accord.
Part of the problem was a legal
battle with a Czecboslovak brewer, Budweiser Budvar, which has its own Budweiser brand. In 1982, a British court decided to let both

companies sell their Budweiser in

Britain. But Anheuser wants the name to itself and is appealing.

Now Anheuser appears to be nearing an agreement under which Watney Mann & Truman Brewers, a unit of Grand Metropolitan PLC. would brew Budweiser under license. The companies have made no official announcement, but Anheuser hired an advertising agency to prepare for a launch later this

In Israel, Anheuser bas appointed National Brewery Ltd. to produce and distribute the American beer. Anheuser also has agreements to ship U.S.-brewed beer to importers in Sweden, Hong Kong, Singa-pore, Guam, American Samoa, New Zealand, Colombia, Peru and

In Argentina and in China's Guangdong province, where Anbeuser also has import agreements, the beer "grossly uncompetitive."

kets before sinking money into ma-

Anheuser may well have been chastened by Schlitz's disastrous effort to brew in Europe.

Schlitz, once the major rival of beer was made available for too Anheuser but now swallowed up by short a period and sold only at Stroh Brewery, built a brewery in Barcelona in 1966, taking on a regional Spanish brewer as a minority partner.

> The big Spanish brewers retaliated by slashing prices, and eventually Schlitz bailed out, giving up maority control in the brewery to its local partner. Schlitz had worse luck in Bel-

gium, where in 1968 is acquired a brewery at Ghlin. The Belgian unit went bankrupt two years later, af-

ing trouble selling beer overseas.

"Beer is essentially a local product," says Ionathan Radice, editor of World Drinks Report. People may drink Coca-Cola or

smoke Mariboros the world over, but most are loyal to their local beers. In any case, foreign brewers face other obstacles, such as West Germany's stringent "purity" stan-dards and the close ties between local brewers and bars in many countries.

The brewers that bave managed to become global are from small countries that left little room for further expansion.

Heineken N.V. and Arthur Guinness & Sons PLC have been brewing abroad for decades, and both derive around three-quarters of their sales overseas. A more recent international star

United Breweries Ltd. of Denmark. When United was formed in 1969 by the merger of Tuborg and Carlsberg, only 25 percent of the company's sales were overseas. Now the figure is about 60 percent. San Miguel Corp. of the Philip-

pines also has done well internationally, scoring notable successes in Hong Kong and Spain. Anheuser is far bigger than any

of these brewers, but analysts say it is too early to judge whether it will become an international force. "This is a very, very long-term effort," says Emanuel Goldman of Mootgomery Securities in San Svend Petersen, United's inter-

sales have completely dried up, national marketing chief, credits says Jack Purnell, bead of An-Anheuser and Miller with rapid rebeuser's international effort, be-sults in Canada. "We expect to see cause the strong dollar has made them in our markets also," he says.

ne beer "grossly uncompetitive." A spokesman for Czechoslova-To date, Anheuser has stuck to kia's Budweiser Budvar seems less the cautious route, refraining from impressed. "They have grown so building or buying foreign brewer- big now they want to occupy the energy loans.

The bank rebounded last year and recorded profit of \$108.3 million, up from \$77.9 million in 1982.

The company will not discuss whole world," he says. But wherever its strategy, but sources familiar or the two Budweisers compete with Anheuser's thinking say it head on, he asserts, "ours is selling wants to test its appeal in safe marmuch, much better."

In W. German Industry

By Michael Blumstein

New York Times Service NEW YORK - Carl H. Lindner, the Cincinnati financier, likes to hand out index cards with oeatly typed sayings. One of his favorites reads, "I doo't understand balance sheets very well, but l do understand people very well."

Mr. Lindner perhaps understates his financial acumen. As founder and leader of American Financial Corp., he has long been considered shrewd in the business world. Now, as chairman of Penn Central Co., he has apparently showed that sharpness again, leading Penn Central into Mesa Petroleum Co.'s bat-

tle for control of Gulf Oil Corp. as a money-maker," said a merger and acquisition specialist at a lead-does best: invest in undervalued ing Wall Street firm, who asked not companies. to be named. "He has the ability to look at something and to move auickly.

His latest move came last week, wheo Penn Central committed \$300 million to Mesa's bid to in- 31.1 percent of Penn Central, 45.4 crease its Gulf holdings to more than 20 percent. In return, Penn 37.2 percent of Circle K Corp. Central will turn a quick profit or will have the first grab at some of

For all his financial sophistication, and a personal fortune estimated at \$250 millioo, Mr. tral, putting in one day a week as Lindner, 63, sports a streak of Midwestern innocence. Not only does sought investments for a growing he hand out adages, he occasionally cash hoard totaling more than \$300 gives away 14-karat-gold cuff links that say, "Only in America," one of his favorite phrases, or "A.F.C. The pointment came Wednesday. Mesa impossible dream.

gala for 7,000 American Financial employees, featuring the country-Western singer Kenny Rogers, as well as bonnses of a week's pay and that it would receive a \$300-million a promise of \$1,000 to every em- investment from Penn Central,

Mr. Lindner, known for working 16-hour days, is basically a conservative and extremely private person. A Baptist who neither smokes nor drinks, he has refused to grant interviews to reporters for years. He took American Financial private in 1981, further diminishing the public scrutiny that he finds so

A native of the Cincinnati area,

acquired some supermarkets. In 1959, Mr. Lindner founded American Financial to diversify into the savings and loan business. Property, casualty and life insurance were added later and now ac-million. count for more than 70 percent of

one of \$2.3 billion. Revenue from the insurance business, as well as profits that reached about \$170 million last "The best way to describe Carl is year, have given Mr. Lindner the

In recent years, Mr. Lindner's purchases have our encountered much hostility, though the stakes he takes are large: American Financial recently reported holding percent of United Brands Co. and

Penn Central's relationship with Mesa came about because Mr. Lindner is frequently more than a passive investor. In June, he agreed to serve as chairman of Penn Centhe previously bankrupt company

The result of Mr. Lindner's appossible dream." said it would lead a group offering
Last Christmas he threw a lavish \$877.5 million for an additional 8.2 percent of Gulf's common shares, to raise its stake to 21.4 percent. At the same time, Mesa announced ployee still with the company in thus gaining new money and five years.

thus gaining new money and weight in its bid for Gulf.

But Mesa paid Penn Central hentures and preferred stock bought by Penn Central carried a healthy 144-percent interest rate. Penn Central also paid \$3 each for 10 million warrants that let it buy Mesa stock at \$12 a share for the oext eight years.

But two other provisions made he dropped out of school after the the transaction particularly attraceighth grade - something he has tive for Penn Central. If Mesa and always been sensitive about — to its partners gaio control of Gulf, help pull the family's small dairy Penn Central has first claim to cerbusiness through the 1930s. He and his two brothers eventually opened rived about half its revenue last retail milk and ice cream stores and year from energy, and has plans to

grow in that area. If, however, Mesa ends up selling its Gulf shares, Penn Central can force Mesa to buy back the warrants at a profit of as much as \$30

"They're taking cash and putting American Financial's annual reve- it to work in an opportunity that is vastly hedged relative to the down-side risk," said Kemp Fuller Jr., an analyst with Moseley, Hallgarten, Estabrook & Weeden Inc., who has been recommending the purchase money to do what many think he of Penn Central stock. The immediate impact is a potentially greater return 00 their cash and market-

able securities." The decision to back Mesa's hid for Gulf was apparently not made hastily. Michael D. Brown, a managing director of Drexel Burnham Lambert Inc., said that his firm was hired as an advisor to the Mesa group "a couple of months ago" and that, by then, T. Boone Pickens Jr., Mesa's chairman, "had already had discussions with Carl about potential investments."

Nonetheless, Penn Central does not plan to follow the route of American Financial and buy major blocks of other companies, according to Keith M. Perkins, its vice resident for public affairs.

"It's just an opportunistic investment that came along," he said.
"Our main line of business is in the energy and technology fields, and we have to grow those husinesses." At American Financial, what

distinguishes Mr. Lindner from others with similar investment strategies, such as Carl C. Icahn and Irwin L. Jacobs, is that he is more willing to stick with a compaoy for the long haul. In the case of Penn Central, for estimated 1,000 digital plants

example, American Financial first closed last year as demand and started investing in 1980. His in- profits sagged, and industry obvolvement with United Brands servers expect another 100 to 300 dates from 1974, and earlier this makers to close or switch sectors month he increased his stake to 45.4 percent from 29.3 percent. "I think he's a very intelligent

and astute investor," Mr. lcahn

Carl H. Lindner

said, "and he has a great deal of patience in waiting to find and realize the gap in what he buys and its

Occasionally, Mr. Lindner does go for the quick profit. He reportedly increased his already major stake in Gulf & Western Industries after the death of its chairman. Charles G. Bhihdorn, a year ago this mooth. At the time, the shares traded at \$20.25 to \$24.875. When American Financial sold a block of million shares back to Gulf & Western last November, it collected \$29.25 a share - \$1.50 more than the market price at the time. ### MADAME DE SEVIGNE: A Life and Letters

By Frances Mossiker. 538 pp. \$22.95 Knopf, 201 East 50th St., New York, N.Y. 10022.

### Reviewed by Audrey C. Foote

F OR three centuries the letters of the Marquise de Sévigné have been relished for their charm, wit, dramatic anecdotes and vignettes of the Sun King's realm. But romantic readers have also searched them for answers to the puzzles of her life. Why did this rich aristocrat, so early widowed, never remarry? Why did this passionate beauty of Louis XIV's permissive society not take a lover? Why did this doting mother neglect her lively affectionate soo and yet write hundreds of extraordinary letters to a daughter regarded by most of their contemporaries as haughty and heartless?

Frances Mossiker, a Splendid Century specialist ("The Affair of the Poisons") has freshly translated Madame de Sévigné's letters, selecting and excerpting for the first time less for their literary or historical merit than for their psychological interest. These letters are inter-woven with a thorough recital of the events of her life; the result is a very revealing and often poignant biography which suggests some plausible answers to the perennial questions. The first marriage did not set a good precedent: Henri de Sevigne had wit, grace, a title

and lands in Brittany, but unique among the gallants of his time, he was immune to his wife's charm. He enjoyed boasting of that fact and of proving it in a series of flagrant liaisons financed largely by his neglected wife's fortune. When this shabby career was cut short in a ducl over a certain "belle Lolo" the marquise was hearthroken — according to some biograwas heartbroken - according to some biographers. But here we have letters in which sho writes of her "calm and happy enough" first year of widowhood, and of her unfortunate experience in marriage; she even cynically remarks, "A young widow is not greatly to be pitied, she will enjoy being her own mistress—or changing masters."

Emerging from her Breton château in 1651. this young widow dazzled le tout Paris (this was before the court moved to Versailles) with her beauty, warmth and wit. She was praised by poets and sought by suitors, among them her lively cousin Count de Bussy, the heroic Marechal de Turenne and the powerful finance minister, Nicolas Fouquet. Though she embraced them all as friends, the only favors granted, apparently, were her loyalty and her letters. (Some were lucky enough to be bothrecipients and subjects of those letters, especially the otherwise unfortunate Fouquet, whose trial for treason and malversation is one of her most famous narratives.) It appears she was as reluctant to bestow her heart as her

It has always been suggested that Madame. de Sévigne's excessive passion and pain weresomehow her less popular daughter's fault, but there is no basis for that here. Though her letters were lost, Françoise Marguerne was as conscientions a correspondent as her mother and, while reserved by nature, satisfactorily, demonstrative in her letters. Their quarrels, either in print or in person during their infrement but long visits to each other, quite clearly originate with the possessive, apprehensive mother, for all her wit and charm, she cannot refrain from begging her daughter to curb the count's ardor and his extravangance. And if the marquise was right to dread the many debilitating pregnancies and the eventual bankruptcy, her warnings caused nothing but

But why did Madame de Sevigne develop and sustain such a consuming and agonizing passion for a child so cool, intellectual, introverted, frail, self-sufficient in her happy marriage—and except for beauty, so unlike her mother? To that, the letters give no clues. Great passions always seem illogical and most-ly they are painful and unfruitful, but some times there are marvelous by products, usually in the arts. In her novel, "The Cannibal Galaxy." Cynthia Ozick has a character repirase the classic judgment: "Madame de Sesigne's unreasonable passion for an undistinguished daughter had turned the mother's prose into high culture and historic treasure."

Audrey C. Foote is a critic and translator living in Washington. She wrote this review for The Washington Post.

### A Robot Challenger for Rubik's Cube The Associated Press

COLLEGE PLACE, Washington - The" Battelle Northwest Laboratory has devised a robot, the Cubot, that solves Rubik's Cube in four minutes. It grasps the cube in two arms, rotating it to scan all six sides, and an optical camera that distinguishes color sends information to a computer brain for the solution.

# Navratilova Staying High and Dry

By Jane Gross New York Times Service

NEW YORK - Virginia Wade's eyes crinkled and she smiled as she observed last week that Martina Navratilova "doesn't even sweat, except for maybe one little wet patch on her

Wade seemed to be joking, yet as she spoke all her companions focused on the quarterfinal match at the U.S. Women's Indoor tennis championships. Sure enough, deep into the second set against. Pam Casale, the world's No. 1 player was dry as a bone.

After years of being regarded as a physically superior but emotionally fittery player who fell apart in the middle of matches and wept after losses. Navrarilova has become the most dominant player on the women's circuit and, some would argue, in the history of the game. Her training techniques, supervised by a retinue of experts and designed with a computer's analysis, have produced "bionic woman" headlines and added to her aura of invincibility.

Her domination has been almost complete since 1982, when she moved ahead of Chris get two or three games. When one player domi-Evert Lloyd and began widening the gap be-tween them. In 1982, Navratilova won 90 of 93 before they walk on the court and they stop matches and 15 of 18 tournaments, losing only to Evert, Pam Shriver and Sylvia Hanika. Last year, she lost only once in 87 matches and 17 commaments, to Kathy Horvath in the French

The Women's Tennis Association has kept rear-by-year records only since 1973, but it is loubtful that anyone has ever won 99 percent of he time, as Navratilova did in the 1983 season, which ends officially this week with a tourna-

In two tournaments this year, she has already ast a match, to Hana Mandlikova, yet there is o significant feeling of hope or confidence mong ber opponents.

New Jersey.

An informal survey of players at the tourna-nent indicated that Navratilova's overwhelmelse in the field. It is not just that she wins, but how — steamrolling through matches of less

"It's mice to know I'm getting that kind of respect," said Navratilova, who still smarts from a lack of recognition earlier in her career. "But I can't go into a match thinking I've got it made because they're lying down and playing dead."

Evert, who inspired the same reaction in the mid-1970s but has lost to Navratilova in their last eight meetings (including the weekend's straight-sets final), said: "A lot of the players, maybe 98 percent, go out there just wanting to

"I'm not at that point. I still feel I can give her a good match and beat her. But there's only so many times you can get drummed by a person

Commented Shriver, the world's No. 3 player: "I know I've been guilty of going out just hoping for a respectable shot. Except for five or six times in my life, I always thought I could win a match — against anybody — and the few times I haven't, it's been against Martina."

Diane Desfor, who quit the tour in 1981 and is now a public relations official for the women's take something away from her, trying to take circuit, said: "Nobody should go out there away ber title, and she has to make them wish thinking, I hope I don't lose love and love,' but they didn't have to play ber."

"I don't think anyone has ever played as good that's the attitude. I remember when Chris was as she is right now," said Wade, after winning winning all her matches, players went out just to only two games from Navratilova in a 47-min-win a game. But with Chris, you could lose love ute match at the U.S. Indoor in East Hanover, and love and it would take a long time - there were rallies, you got to hit the ball. Martina doesn't give you that chance."

The serve-and-volley players, such as Shriver, ing success had mimidated almost everyone have the best chance to succeed against Navratilova, but there are fewer of them these days. how — steamrolling through matches or resultant and hour and rarely losing as many as half a dozen games. Most of her colleagues said they Jo Durie try to play her right within what they've got. Who else? Pam? Hana? Chris got all they've got, who else? Pam? Hana? Chris got all they've got, who else? Pam? Hana? Chris got all they've got, who else? Pam? Hana? Chris got all they've got, who else? Pam? Hana? Chris got all they way to beat Martina, and Chris is the only one who plays it at a level to do that."

JoAnne Russell, the only one other than Evert who said she played Navratilova expecting to win, observed that she would not be as confident if she were a baseliner.

"Imagine how it preys on your psyche if you're a baseliner and you can't win a rally," she said. "What's left? You have no guns. All you can hope for is a great day with your passing Navratilova agreed. "A good serve-and-vol-

leyer is more dangerous to me than somebody who plays at the baseline," she said. "It worked for Chris because she made fewer errors than anybody else, but now I'm not making them The ease of ber victories has not affected Navratilova's drive. "I'm having too much fun

hitting the ball and working on my game," she

said. "I'm thinking too much on the court to be

bored, regardless of the score." Nancy Lieberman, the former collegiate basketball star who is Navratilova's companion. said: "We approach it that people are trying to

Martina Navratilova ... It's nice to know I'm getting that kind of respect."

# Lockridge Wins Title With 1st-Round KO

Lockridge ended Roger Mayweather's reign as World Boxing Association junior lightweight champion Sunday night with a devastating overhand right knockout punch 1 minute and 31 seconds into the first round of their schednled 15-round title fight.

Lockridge, who weighed pounds 128½ (58.3 kilograms) stepped inside a Mayweather left jab and threw a perfect, short right that sent the champion sprawling face forward. Mayweather rose to his knees, but was unable to beat referce Larry Bozadilla's count. He was assisted by two ringside doctors and his handlers to a stool but was still dazed several minutes after the

Lockridge, 25, improved his re-cord to 33-3 with 27 knockouts. Mayweather, 22, who weighed in at the 130-pound limit, suffered his first loss in an 18-bout career.

"I was more amazed than the people watching the fight," said the new champion. "I was jabbing and got inside on him. I threw a little shot to the body and then I just came over with the right hand."

The Associated Press "I just anticipated a very classi-BEAUMONT. Texas — Rocky cal light," Lockridge said. "He ockridge ended Roger would box and stay away from me and just outpoint me. Unfortunately, he just wanted to slue with me right off the bat and just came right

to me. "The first round is always a cold round and its anybody's at that point," said Mayweather. "I got-caught cold probably because I had such a long layoff" — six months.
"I was rusty but yet I didn't feel rusty. You always think that you're more prepared than you are at that point. So I don't really have any excuses. He just caught me quick-

Lockridge had lost a pair of 15-round decisions to WBA featherweight champion Eusebio Pedroza in two prior title fights.

The fight was Lockridge's first as a junior lightweight after a long campaign as a featherweight.

His first loss to Pedroza in October 1980 ended in a split verdict for the champion. The second, in April of last year, was a unanimous decision for Pedroza.

Mayweather won the title from Sammy Serrano in January 1983 and defended successfully twice.

# **Drioles Gross and Underwood Happy to Be Smaller Fish in a Bigger Pond**

By Thomas Boswell Washington Post Service

- MIAMI - Veterans know what okies seldom understand: It's tter to play the cymbal in a symlong than be the bandleader in a and louinge

That's why Wayne Gross and om Underwood are as delighted : children in a toy store this ring. They would rather be pepheral parts of the world champi-Baltimore Orioles than central gures with the mundane Oakland

In the minors, you can dream sout all-star teams and millionallar deals. When you hit .324 in e Pacific Coast League, as Gross ice did, or strike out a man an ning, as Underwood did one year Reading, Pennsylvania, you're intled to fantasies.

Eventually, bowever, every play-learns his true place within his amond world. After that insight rives, a veteran longs to be own not for what he hopes to be t for what he is. He wants man-eable work at which be can excel winter, the interest in me was not

U.S. College Basketball Standings

and a calm appreciation from his

For Gross and Underwood, the star track wasn't the right tack. Their lessons in baseball humility well learned, they are now ready for restored pride.

Gross's eight-year career batting average is .235 — the kind of stat that can cost you your Major League Baseball Players Association union card, especially if, when you dive for a ground ball at third base, people feel the urge to yell, Timber!

"I've never been real stuck on myself," says Gross, acquired by the Orioles in a trade for Tim Stoddard. "Early in my career, I had a reputation as a had third baseman. That's because I was a bad third baseman. When Clete Boyer came to Oakland as a coach, I said, 'Hello, Mr. Boyer. Nice to meet you. I can't play third base. Will you teach me?"

In 10 seasons, pitcher Underwood's won-lost record is 85-87 with a 3.90 carned-run average.

tremendous," understates the lefthander. As soon as be heard the Orioles had even the slightest interest in him, he told his agent, "Let's give it everything we've got to go there — even if 27 teams hid for me, Baltimore would be my first

Early in their careers, these men might have felt slighted by their current roles. Now, Gross's face brightens when he discusses all the grubby odd jobs he can do, just as Underwood speaks with pride about his handyman abilities.

For instance, Gross is carrying three gloves in spring training. His main task is to platoon with goodfield, no-hil Todd Cruz at third, but he is also working out at first base and even as a third-string catcher. "I can give Eddie Murray a day off so he can kick back and relax," says Gross. "Or if they know I can catch, it might give Joe Altobelli an extra [pinch-hitting] move in the late innings because he knows he's got another body if he

Underwood is booing to fill the ninth spot on a nine-man pitching heart of the lineup, even cleanup at

A STATE OF THE STATE OF

I've never had a sore arm in my tife. in one stretch. Oakland asked Un-l can pitch long relief, give Tippy derwood to relieve 36 times and Martinez a day off in short relief or spot start in an emergency."

These men know about the nearly amazing transformations that their roles, the former A's may now have happened to pliant journeymen when they arrived in Baltimore in recent years. Much like Underwood, Steve Stone had a losing career record; in his second year as an Oriole, Stone won 25 With Baltimore, he won't have to games and a Cy Young award, play every day for a sweltering John Lowenstein's career figures once looked much like Gross's, but for the past four years Lowenstein has been one of the most produc-

tive hitters per at-bat in baseball. Something good happens to a Lowenstein and Ken Singleton, player when he can perform within having nightmares about his flaws. Gross and Underwood know that. game. Last season, they were fairly important parts of the A's. That's part of the reason Oakland lost 88

. The A's asked Gross to bat in the

staff by "doing some of everything. times. He hated it, going 3-for-100. derwood to relieve 36 times and start 15 games. All it brought him was disorientation.

From being underqualifed for he a tad overqualified -a comfortable situation. Gross knows he'll not be asked

to face those nasty curve-balling lefties who throw him into slumps. month or tough it out with injuries. Instead, he can but seventh and feed off the fastballs tired pitchers throw after straining their arms with curves to Cal Ripken, Murray,

"My whole career, I've felt like I himself, avoid embarrassment, stop was the guy who should be doing it having nightmares about his flaws. — "Got to do it," " Gross said. "And a lot of times, I wasn't doing They've seen the other side of the it. It's tough on a streak hitter like me. I'll hit seven homers in a week. then I won't hit one for the next month and a half. Here, I can relax and just do my job."

The Orioles know the value of

their Jim Dwyers and Joe Nolans, so they already sense the improvement that Gross and Underwood

Unhappy at Oakland in 1983.

He'll get his face dirty at third base and he has the power to hit 15 or more homers," says Manager Altobelli. "Underwood balances the could provide. hell out of the bullpen. We'd have two lefties and two righties."

LA VENTURA MADRID CRISTAL

### Inspirational: The guy can't play, but makes a lot of noise. Momentum: Applied to whichever team just scored. Erudite: A player who knows

By Jim Murray Los Angeles Times Service

LOS ANGELES - In a recent issue of Time magazine, writer John Leo dealt with one of the intriguing problems of our day: how to read your newspaper. The trick is to cut right through the code words, to decipher the real meaning behind the surface prose.

For instance, he quotes Richard Cohen of The Washington Post. who recalls his indoctrination into the arts and mysteries of journalism-speak when he was a young cub sent out to interview a lawyer who had always been identified in print as "ruddy-faced." The man, reported Cohen, was "woozily abusive" and given to lurching about unsteadily. "Cohen instantly real-ized the real meaning of ruddyfaced is drunk."
That's the way the deadline

crumbles. Leo cites other instances of a spiritual malaise wherein the typewriter just seems to ink in its own cliché without conscious effort on the part of the writer. The Middle East is "strife-torn," Leo says - unless peace breaks out, when it becomes "much-troubled."

And then there are readers in the United States who think the right title of the group is "The Outlawed Irish Republican Army." Individuals get labeled with sim-

ilar buzzwords. "Imposing." Leo points out, means just what it says when it is applied to a man. Applied to a woman, it means battle-"Missions" are always "fact-

finding," panels are "blue-ribbon" and the chips always "fall where

Sports is no less guilty. You need a lexicon to unravel the common meaning of most words you read.

Controversial: A guy who is a pain to the team, the league, the press and probably his wife.

Transition

BASEBALL Mational League
MONTREAL—Traded Al Oliver, first baseman, to San Francisco for Fred Breining,
Pitcher, and a player to be named later.
HOCKEY

what state he's in at the moment although not nessarily its capital. Outspoken: A bully.

Grizzled: Senile. Feisty: Leo says it signifies any person the journalist considers too short (in his case, anybody under 5foot-6) and not dead, but in sports it indicates a guy who is indefatiga-bly rude. And, of course, short. Leo

notes that nobody over 6 feet is ever "feisty." On paper, the best: A team sure to lose. Nobody ever needed a piece of paper to prove that the 1927 Yankees should win it. You need paper for the Cleveland Indians.

Temperamental; Crazy, Rollicking: Drunk. Unassuming: Boring. His own man: A guy no one else

Hates to lose: Usually a hypocrite. Hates to strike out. His real attitude: the team is on its own.

Talent-loaded in the conference: Cheaters.

Gutty: Your team. Cocky: Their team.

Perennial powerhouse: A team you don't like, usually Notre

Potential: Something that never comes. Nobody, but nobody, ever said Willie Mays had "potential" You either have it right from the start or you never get it. Heady: A guy who knows bow

many outs there are at any given moment Intense competitor: Sociopath.

John Dillinger was an intense competitor, So was Himmler,

Articulate: Reserved for people who surprise you that they can talk. Ill-starred: Any team that repeatedly finds a way to lose. Illprepared is closer.

As long as you know that the source of a "clubhouse rumor" is usually one's bartender and "word around the league" is something you hope happens and you under-stand that "hype" is the other guy's story, not yours, you are ready for the season. You are also a certified

We all know what a cynic is. He's a guy who won't believe your lies.

# You Can't Win 'em All

sured by the Reagan government that it was in shape to take on the "peacekeeping role" assigned to it hy President Amin Gemayel. U.S. military advisers in charge

of training the Lebanese soldiers kept sending back optimistic reports that Gemayel's army was pre-pared to handle any situation. Wbat went

wrong? I asked a high-level offi- c. Buchwald cial in the Pentagon if he had any

The Lebanese Army was well equipped, morale was high and the average Lebanese soldier could be counted on to hold his own against any fighting man in the world," the official said. Then why did the army fall

"We didn't count on the fact that the Christian soldiers would not take orders from their Moslem officers, and the Moslem soldiers would not take orders from their Christian officers." "Why not?"

Because we found out recently the Christians and the Moslems hate each other."

"Didn't we know that when we gave the army all that equipment? "Of course not. How could we know something like that?" "It's been public knowledge for

the last 2,000 years." "It was our opinion that the religious differences would play no part once everyone wore the same uniform. We felt a soldier's loyalty toward his comrades in arms would overcome any antipathy one sect in Lebanon had for the other. This proved true when everyone slept in the same barracks. Unfortunately it didn't when the army took to the

"Didn't you have any inkling that the army would fall apart when the soldiers were asked to fire on their own people?"
"No, we didn't. The first hint we

WASHINGTON — The complete collapse of the Lebanese went over to the other side with Army came as a surprise to most their weapons. When we com-Americans, who kept being reas-plained about this, the Christian officers gave orders to shoot the Moslem soldiers, and the Moslem officers gave orders to shoot the Christian soldiers. That's when we realized we had a morale problem on our hands."

"Was the president informed

"I imagine he was. But our advisers were instructed not to worry about it, because the U.S. Navy would fire on Syrian-supported rebel positions to protect the Leba-nese Army soldiers from killing each other.'

Apparently the strategy didn't There was a mix up in signals.

The White House said we were only firing at the Moslems to protect the U.S. Marine peacekeeping force, and the secretary of the Navy said we were shelling the Druze to support Gemayel's troops. Before this could be straightened out, the Druze started their own offensive against Christian positions, and this was the signal for the Moslem soldiers to stop fighting."
"So now the Moslems bave balf

our arms, and the Christians have the other half. What did we accomplish by training the Lebanese

"It gave the president an excuse to move the Marines out of Lehanon, something be's been wanting to do for some time."

"That's a hig plus. But wouldn't you say this was a hlow to President Reagan's Mideast policy?" "He doesn't seem to think so. After all there is a lot more at stake in the Middle East than what happens in a tiny country like Lebanon. Once the Christians and Moslems settle their feud amongst themselves we can get back on the track again."

What will happen to the U.S. advisers that were training the Lebanese army? They'll be sent to El Salvador to

beef up the government's army there. We've had good reports the Salvadoran soldier can hold his "No, we didn't. The first hint we own against any fighting man in had that things weren't going as we the world."

# Shohei Imamura, the Tofu Maker

Film Director Prefers Peasant Vitality to Samurai Tradition

By Christine Chapman International Herald Tribune

OKYO - Shohei Imamum accepts as history the Japanese legend of taking the elders of the village up to the mountain and leaving them there to die when they reach 70. His movie about the custom, "The Ballad

of Narayama," has just won the Japanese Academy Award for best movie of 1983, in addition to the 1983 Cannes film festival's Golden Palm. Described as "pornographic,"
"beautiful" and as "raw realism," the film has raised questions over the authenticity of the custom known as obasute.

"I believe in obasute," Imamura, 57, said simply during a recent interview. "I found evidence in three villages that it existed. It happened in Japan and in old China, in Eastern Europe and among the American Indians and Eskimos. If one human baby is born, an old person must go to Narayama to keep the population balanced." In the film, an elder son agonizes over the

decision to carry his mother. Orin, up to Narayama, the oak mountain. At almost 70, Orin is so strong and healthy that she knocks out her two front teeth to appear old. Unlike her neighbor, who hysterically resists being dragged up the mountain, the old woman embraces the idea of returning to nature among the bleached bones of her predeces-

Through image after shocking image, Ima-mura reveals the necessity for the fateful trip: extreme poverty, a limited food supply, the pressure of new births and a primitive belief in population control that involved not only casting off the aged but a taboo on sex for all sons except the eldest.

Set in an isolated village in northern Japan 150 years ago, "Narayama-Bushi-Ko," its Japanese title, vividly depicts the cruelty of peasant life; the hurring alive of a whole family by irate villagers, a bloated dead baby floating in a mountain stream, the shackling of the querulous old man who does not want to die.

Such scenes are contrasted with robust shots of the coupling of lovers, of a country festival, of work in the fields and fornication with animals. Imamura is in love with the vulgarity and the vitality of the common people, or shomin. He believes that shomin culture, not that of the samurai warrior class, is the true culture of Japan.

"I am part of shomin," be explained. "My grandfather was a farmer, but my father became a doctor. In the 1920s, when I was a child, 85 percent of Japanese were farmers. Shomin life interests me, for it has more vitality than the rea-ceremony tradition of samurai. To be samurai is to be idealistic, brave, to know shame, things which are

Shohei Lmamura

taught in school. Shomin is realistic, vigorous. Both aspects of the culture exist in Japan today and influence each other."

am realistic as a director." Imamura insisted, "not as a person. Being a director, making movies, is rather romantic, not like being an ordinary man on a salary." "The Ballad of Narayama" is based on a

1956 prize-winning oovel by a professional guitarist who became a farmer, Shichiro Fu-kazawa. Now approaching 70, Fukazawa is reported to be displeased with the two film versions of his book. He described Keisuke Kinoshita's 1958 version as "tear-jerking." and Imamura's as pornographic.

Although he has been known in Japan for at least two decades, Imamura has finally received international recognition. "The Ballad of Narayama" has so far played in several European countries and in Hong Kong, as well as in film festivals. Imamura recently attended festivals in

Moscow and Bombay, where he lectured about the movie. He is a modest man and refused to go to Cannes for his award, despite the urgings of the Toei Distribution compa-ny, which financed the film. His reason: "I'm afraid of planes and I hate parties. I was born He also disapproves of film competitions.

and had not intended to present "The Ballad

of Narayama" at Cannes, because it was

"The spring scene in the village had not been shot," he explained, "because snow was still on the ground. Toei offered more money to get it done. They cleared the snow with a buildozer after flying the parts up to the

village by helicopter."
In 25 years as a director, Imamura has made 15 films, including "Pigs and Battle-ships" (1961), about poor Japanese and the U.S. Navy in Yokosuka, "Insect Woman" (1963), "Vengeance is Mine" (1979) and "Eijanaika" (1981), which portrays low-life Ja-pan in the last days of the 19th-century Edo period. When the production company backing him failed, Imamura made documentaries for television.

Joseph L. Anderson and Donald Richie, in "The Japanese Film: Art and Industry," credit Imamura with "one of the most distinctive styles" in film today, emphasizing that he sees Japan as a "technological tribe" "controlled by the most basic (and the most natural) of urges, compulsions and supersti-

"Making a film is like making tofu, or bean curd." Imamura said, recalling the words of the director Yasujiro Ozu, for whom he worked as assistant. "Ozu called himself a tofu-maker because he always made home dramas. I make the shomin in history." It was after seeing the movies of Akira Kimosawa, the only other Japanese director to win the Golden Palm at Cannes (for "Kagemusha" in 1980), that Imamura became interested in the cinema as a profession.

He was born in 1926, and was 18 and due to be recruited when the emperor announced Japan's defeat in World War II. He had feared he would die on the beaches of Chiba, Japan's Pacific Ocean coast and had thought he would never live to 20 or 30. "It gave me unlimited freedom," he said.

Imamura hopes to make two or three more films, but is busy for the moment with his directing school in Yokohama, the Broad-casting and Movie Technical School, where he teaches three days a week. He is also preparing a stage play for Osaka in October, rewriting and directing an old drama. He wrote the script for "The Ballad of Narayama" and calls writing his greatest plea-

"I want to make a good play," he said.
"For the real shomin who want to cry and laugh and have a good time." After the play, he may make another mov-

ic, although, according to film-industry superstition, he noted, the one produced after a winner usually fails. It takes him two to three years to make a film, which means he will have time for three more before he's 70. "Then," Imamura said, "I'll follow nature.

**PEOPLE** 

# Bonanno's Complaint

The reputed organized crime paper, published a front-page pic-boss Joseph Bonamo has sued his ture of Prince Andrew next to a publisher, Simon & Schuster, for photograph of a nude woman that a \$18 million over what he calls the it said was of Andrew's latest girl depiction of a "cheap gangster" on friend, model Katie Rabett. Rabett the cover of the paperback edition 23. angrily described as of latest of his autobiography. Bonanno, 79, that photo and another or said the paperback edition 23. of his autobiography. Bonanno. 79, who is serving a federal prison term side page. Both were in soft form in Kentucky, also demanded that all 100.000 copies be recalled. "My heart started to palpitate" on seeing the paperback version of "A sociation, Britain's domestic new was quoted as saying by Press Aring the paperback version of "A sociation, Britain's domestic new agency. But she added, "Possion in papers filed in New York. The ailing Bonanno said he was shown the book by another inmate. The book's cover shows the torso of a man in a pinstriped suit with a man in a pinstriped suit with a white tie, black shirt and a red rose in his lapel, in what the suit charges. is "the typical dress of a cheap; gangster-professional killer."

The official search for the Japa-

nese adventurer Naomi Uemura, 44, was called off Sunday in the belief that the man who made the first solo winter climb of Mount McKinley, Alaska, North America's highest mountain, is dead and buried under the snows. "In my opinion, it is almost conclusive he is dead," said the veteran U.S. climber Jim Wickwire, who helped lead a six-day search for Uemura. Uemura reported Feb. 13 by short-wave radio that he reached McKinley's 20,320-foot (6,190-meter) summit Feb. 12. He was last seen on Feb. 16 when a bush pilot spot-ted him 4,000 feet below the top. Uemura, who has scaled the highest peaks on every continent except Antarctica, began chimbing Mo-Kinley Feb. I and was due to return to his base camp Feb. 15. **G** :
